402

(M2) a larger dictionary of common values.

4/7

F_1	F_2	...	F_k	O_1	O_2	...	O_l	F_{k+1}	F_{k+2}	...	F_{k+l}
-------	-------	-----	-------	-------	-------	-----	-------	-----------	-----------	-----	-----------

This field value is used as a pointer
into a dictionary when O_1 is not
large enough
for that

401

Fig. 4 Variant use of field values for larger dictionaries.

An exceptionally large value F_1' for F_1 is stored as an extra variable-sized field. F_1' , the fixed slot for it, is used to stored the offset pointer to terminate F_1 .

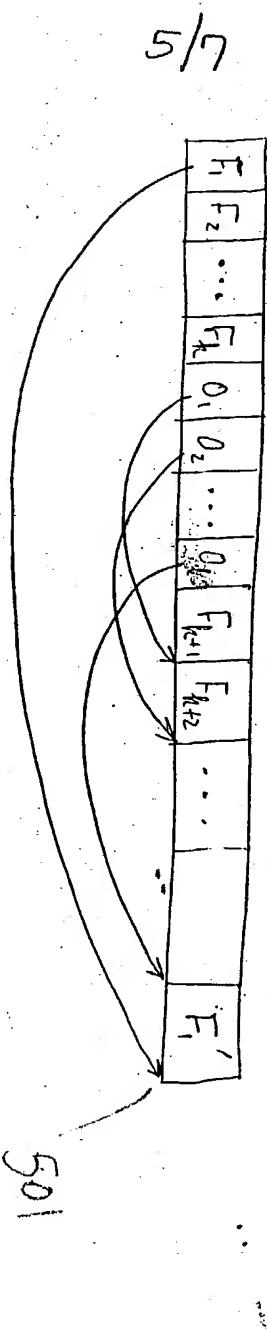

Fig. 5 Exception (overflow) for fix-sized fields.

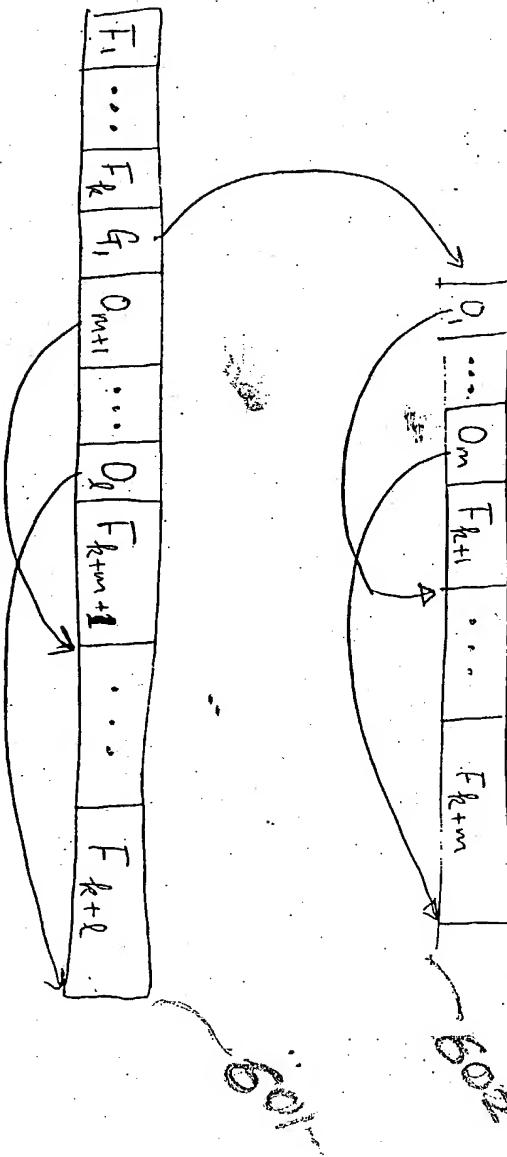

In a dictionary of common tuples,

layout for the group of fields F_{k+1}, \dots, F_{k+m}

O_1	\dots	O_m	F_{k+1}	\dots	F_{k+m}
-------	---------	-------	-----------	---------	-----------
